REACT PROJECT

PROFESSIONAL SUMMARY

As a backend developer with 3 years of experience in Ruby on Rails, React, Django, and Ruby, I am adept at translating complex requirements into scalable code. I possess the ability to learn new digital products and work independently on high-quality code and my passion for creating exceptional user experience has received accolades.

EXPERIENCE

Software Engineer, PlanSource

Apr/2023 - Present

- Presented a complex feature to CPTO and SVP Engineering, that helped customers create Benefit templates faster and reduced the operations time by 30%.
- Excelled at writing high-quality code with minimum discrepancies which significantly reduced SDLC bugs for the scrum team.
- Developed automated scripts to simplify common tasks and reduce manual effort.
- Shared a good rapport with the team and helped them improve code quality and ensure adherence to best practices.

Assoc. Software Engineer, PlanSource

Apr 2021- Mar 2023

- Optimized code to improve the performance of AI features.
- Fixed Bugs from Engineering Backlog in the application, changing/modifying code based on the requirement.
- Resolved technical debt issues with RSpec.
- Improved coverages of Unit tests on the code base.

Software Engineer, MountBlue Technologies

Jan 2021 - Mar 2021

- Trained in Ruby on Rails, JavaScript, Git, and PostgreSQL.
- Developed a robust E-Commerce site and blog utilizing Ruby on Rails as the backend framework.
- Developed a Ruby-based IPL data project incorporating JavaScript for interactive data visualization of IPL matches.

Operation Associate, Solartis LLC

Jun-2019 - Jun 2020

SKILLS & TOOLS

Skills: Ruby on Rails, React, Django, Ruby, RSpec, MySQL, JavaScript, Git

Agile & Tools: Jenkins, samson, Gitlab, GitHub, JIRA, Confluence, JetBrains, postman

EDUCATION

2015-2019

Bachelor of Technology, Information Technology
KLN College of Information Technology, Sivaganga

EXTRA-CURRICULAR

- Developed a game-hub application using React, Axios, and the RWAG API.
- Built an expense tracking application using React.
- Built an online quiz using Django
